

GIFTED THINGS

Sustainability

At Gifted Things, we care about sustainability and the impact we have on our environment.

We also hate single-use packaging and plastic!

So, our gift boxes and packaging are perfect for reuse for your own gifting purposes or as handy storage around your home.

Our Kraft hamper boxes are made from 100% recycled materials and are more sustainable than white or colour-dyed boxes. Wood fibre is used instead of plastic beads or bubble wrap, and it has a range of uses around your home and garden. We are replacing single-use packaging with more sustainable materials, including compostable plastic.

Our plants come in Artivasi recycled plastic grow pots, which can be removed from decorative pots for watering and reused again and again as your plants grow.

The Gifted Things team continue to seek out more eco-friendly packaging and products along with small businesses that share our sustainability values. We would love your suggestions on innovative products and local companies to help us grow and improve our sustainability practices.
